Employment

Currently

Developaps | Valencia

Android Developer

At Developaps I work in small and medium Android projects with Java and Kotlin, using the last technologies of continuous integration and also design patterns, UI and Unit testing, RSS integration, pay platforms, etc. with agile methodologies. These are some of the clients for whom I have worked: Hofmann, Fermax, Ingénico, Porcelanosa.

2010 - 2016

Capgemini | Valencia

J2E Developer

I've been working in J2E development using latest technologies and frameworks like Java, Spring, Hibernate, Devon Framework, Sencha ExtJS, jQuery, HTML5 and CSS3. Making high quality code with continuous integration with Jenkins, Sonar Qube, unit testing and also Scrum as an Agile framework for complete with success the big projects. I've been developing for important customers like Universidad de Valencia, Aguas de Valencia, Ayuntamiento de Valencia and Sanidad.

2004 - 2006

Asoin 21 | Valencia

Desktop Apps Developer

I worked as a desktop applications programmer, developing with Visual Basic, Sql Server, GeneXus, GXplorer and Crystal Reports. I've participated in large part of the most important company projects:

- Quorum ERP for integrated management of enterprises.
- And a GXplorer datawarehouse project for Inlet Sealish Corp.
